

Publishing Article Collections, Series, and Supplemental Issues with *Current Oncology*

As Canada's premier Oncology journal, we invite cancer agencies, organizations and researchers from across Canada to publish with *Current Oncology*. The journal provides an excellent venue and opportunity to increase the visibility of your studies and investigations to members of the Canadian Oncology community. Publishing in an established journal with a well-developed readership, is an excellent way to reach your key audience. It also keeps the community informed of ongoing work in the field, as well as important research and findings that have a clear potential for application to the current or future practice of cancer medicine in Canada.

Recently published series and supplements

- Original Cancer Costing Research Using Canadian Data (Supplement, 2016)
- The Two Solitudes of Primary and Cancer Specialist Care, a collection of papers from CanIMPACT (Article Collection, 2017)
- HPV Self-Sampling in Promoting Cervical Cancer Screening (Article Collection, Coming 2018)

"There is no other oncology journal which **reaches all oncology practitioners in Canada** and aims to be **directly relevant to the Canadian situation**. That is what makes *Current Oncology* unique and important."

*Dr. Eva Grunfeld, Guest Editor,
The Two Solitudes of Primary Care & Cancer Care
(article collection from CanIMPACT)*

PUBLICATION OPTIONS

- Single article published in a regular issue
- Dedicated supplemental issue
- Article collection in single issue
- Articles series in multiple issues

"Despite the importance of costing work, Canadian oncologists, health services researchers, and policymakers have long experienced difficulty publishing Canadian analyses in international journals. *Current Oncology* provided a **venue that has a wider reach in the Canadian community**, and an audience that was **attuned to jurisdictional differences**"

Dr. Nicole Mittmann, Co-Guest Editor, Original Cancer Costing Research Using Canadian Data (supplement)

"*Current Oncology* is an open access Canadian journal that is well read in the oncology world. **It is important to have a journal that incorporates the Canadian perspective**, as many of the issues that face the US and/or European health-care systems are not applicable here, and vice versa."

Drs. Aisha Lofters and Mandana Vahabi, Co-Guest Editors, HPV self-sampling in cervical cancer screening (article collection)

Do you have an idea or suggestion for an article series, collection or supplement?

Provide a brief summary of the work to be published, as well as its importance, timeliness and relevance to the Canadian oncology community. The summary should also include:

- Suggested Guest Editor (if applicable)
- Outline of suggested topics
- Potential funding sources (industry, author fees, grants, etc.)
